SUMMERY

I am passionate about web development, I have worked on several projects. I am a quick learner and intend to be part of an organization where I can improve my skills and make good use of it.

PROJECTS

eShop — Ecommerce Website

October 2020 - github.com/zahidkhan846/eShop

Technology used:

React, CSS, SCSS and for backend Firebase Firestore and Authentication was used.

Description: This was my personal favorite which I always wanted to do. In the development of this website React, Redux, Redux-Saga and other React concepts were used. And for databases and authenticating the user Firebase was used.

Burger Builder — Burger Builder App

August 2020 - github.com/zahidkhan846/burgerBuilder

Technology used:

React, CSS Modules and for backend Firebase and Authentication was used.

Description: This project was created during the course which implements React, Redux, Redux Saga and lazy loading for better optimized web experience.
